DAY 1 · 1 of 3

ARRIVAL & NATCHEZ EXPLORATION

No riding today — arrival day.

Arrive in Natchez — one of the oldest cities on the Mississippi River. Spend the afternoon and evening exploring before your ride begins tomorrow.

HISTORY & CONTEXT

Natchez sits on a bluff 200 feet above the Mississippi River and has been continuously inhabited for over 10,000 years. The Natchez people maintained their capital here until colonial wars in the 1730s dispersed them. By the early 1800s, Natchez had become the wealthiest city per capita in the United States — built on cotton and enslaved labor. The antebellum mansions you see today are the legacy of that era. The city was largely spared during the Civil War, preserving much of its extraordinary 19th century architecture intact.

POINTS OF INTEREST

● Natchez Bluffs & Under-the-Hill

Walk

The bluffs overlook the Mississippi — best at sunset. Under-the-Hill was once the most notorious district on the frontier.

● Stanton Hall

Tour

One of the grandest antebellum mansions in America. Tours run daily. Allow 60-90 min. Book ahead in spring.

DAY 2 · 2 of 3

NATCHEZ TO PORT GIBSON

~42 miles · Rolling hills · Smooth NPS asphalt all day

Map unavailable — add Mapbox token to generate maps

■ From The Burn, head south on Oak St → right on Franklin St → left on Canal St to Visitor Center. ~0.6 miles.

Your first day of riding begins at the Natchez Visitor Center. The Parkway wraps you in forest and calm immediately. Keep eyes open for deer, wild turkey, and armadillos in the early miles. Smooth NPS pavement, light car traffic, and your pace entirely your own.

TERRAIN & SURFACE

A longer day but consistent terrain — smooth NPS asphalt with a 3-5ft paved shoulder throughout. Gentle rolling hills through dense hardwood forest. No significant climbs. The biggest elevation is gradual and spread over miles. Moderate pace riders typically complete this in 3.5-5 hours of riding time.

HISTORY & CONTEXT

This is the most historically dense day on the route. Emerald Mound at mile 10 is one of the most significant pre-Columbian sites in the country — a ceremonial platform mound covering eight acres, built by the Plaquemine culture between 1300-1600 CE. Further north, Mount Locust was the first inn on the Trace, serving the boatmen walking home to Nashville after floating goods to New Orleans. The Sunken Trace near mile 25 shows the physical depth of the route's history — the trail worn six to eight feet below grade by centuries of foot and hoof traffic.

POINTS OF INTEREST

● Emerald Mound (MP 10.3)

Must Stop — Allow 30 min

Second largest Native American earthwork in the US. Climb to the top. The size is staggering — eight acres at the base, built basket by basket.

● Mount Locust Inn (MP 15.5)

Stop — Allow 15 min

Built 1779, the oldest remaining inn on the Old Trace. NPS interpretive talks in spring. The surrounding grounds are beautiful.

● Sunken Trace (MP 25.0)

Stop — Allow 15 min

The original trail worn six to eight feet below grade by centuries of use. Walking down into it changes your relationship to the history.

● Port Gibson Church Street

Evening Walk

The Golden Hand steeple of First Presbyterian Church is unmistakable — and unexplained. Walk Church Street before dinner.

DAY 3 · 3 of 3

PORT GIBSON TO ROCKY SPRINGS

~40 miles · Rolling hills · NPS asphalt + Windsor Ruins detour on county road

Map unavailable — add Mapbox token to generate maps

■ From Isabella House, turn right on Church St → left on Hwy 61 north. Parkway re-entry at MP 39.2, ~0.8 miles.

Today features the single most memorable detour on the Lower Trace — the Windsor Ruins. Plan extra time. The day ends at Rocky Springs, a ghost town slowly reclaimed by forest, where the free NPS campsite sits among ruins of what was once a community of 2,600 people.

TERRAIN & SURFACE

Your longest day. Smooth NPS asphalt throughout, with one notable exception: the Windsor Ruins detour onto Rodney Road is a narrow 2-lane county road with no shoulder. Ride single file, stay right. The detour is 1.5 miles each way on rougher pavement. The final approach to Rocky Springs includes a 0.3-mile gravel access road to the campsite — walk it if you're on 25mm road tires.

HISTORY & CONTEXT

Windsor Ruins and Rocky Springs tell two very different stories about the antebellum South's rise and fall. Windsor was the grandest mansion in Mississippi, built in 1861 and surviving the Civil War only to burn in 1890 from a dropped cigarette — 23 cast-iron columns are all that remain. Rocky Springs, by contrast, was a community of ordinary people whose town was slowly erased by yellow fever, war, soil exhaustion, and the boll weevil. The 1837 Methodist Church still stands among the ruins, holding services until 1904. Both sites sit quietly in the forest now, reclaimed by the same landscape that once fed them.

POINTS OF INTEREST

● Windsor Ruins (MP 30 detour)

Must Stop — Allow 45-60 min

Turn onto Rodney Road at MP 30. 1.5 miles to the ruins. Twenty-three Corinthian columns in a forest clearing. Open sky, no walls, vines climbing the ironwork. It earns the detour.

● Sunken Trace, Section 2 (MP 45.7)

Stop — Allow 15 min

The deeper of the two Sunken Trace sections. If you missed the first one, don't miss this.

● Owens Creek Waterfall (MP 50.0)

Quick Stop

Small waterfall, 2-min trail. Cool and shaded — a good final rest before camp.

● Rocky Springs Ghost Town (MP 54.8)

Explore at camp

Walk the ghost town trail at dusk. The 1837 church, foundations, and the original spring are all within easy walking distance of the campsite.

LUNCH OPTIONS

FILL ALL BOTTLES HERE. This is the last reliable water before Rocky Springs. Do not skip this stop.
